Comments: (If possible, please reference section number and/or page number in document if applicable.)

1 continued below
Spent nuclear fuel and radioactive waste should remain at the sites where it is manufactured instead of risking accidents and contamination by shipping it to Yucca Mountain. Maybe superhuman drivers can be found who don't make errors in judgment.

2
If contaminant material is spilled or released during an earthquake it will pose a threat to the ground water. How can we be sure that a strong earthquake isn't going to cause an upheaval and affect the groundwater.

1 continued
"Wait and see" for another 25 years. In the meantime new technology might be implemented and there will be alternatives to a repository at Yucca Mountain.

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.
